POWASSAN, Ontario
POH 1Z0

Dear Mr. Mason:

I am responding to your request for information on environmental hypersensitivity (see letter attached). Unfortunately, the Department of National Health and Welfare has not published any reports on this topic.

This issue has been most thoroughly reviewed by the Ontario Ministry of Health which has produced two reports. These are:

1. Report of the Advisory Panel on Environmental Hypersensitivity. 1986.
2. Report of the Ad Hoc Committee on Environmental Hypersensitivity Disorders. 1985.

Both reports are available from the Ontario Ministry of Health, Communications Branch, 9th Floor, Hepburn Block, 80 Grovenor Street, Toronto, Ontario, M7A 1S2.

One other document, which is written in a more popular fashion, is the following:

Sennett, John (1987) The Brown Plague. Understanding Hypersensitivities in Humans. Published by Interaction Consulting and Enterprise, P.O. Box 180, Durham, Ontario, NOG 1R0. ISBN 0-684-18592-3.
